# YOUR GUIDE TO ENHANCEMENT PACKAGES FOR SAP ERP

## OPTIMIZE YOUR ROI WITH NEW AND ENHANCED FUNCTIONALITY

The enhancement packages for the SAP ERP application provide new and improved software functionality to add innovation to your business in a flexible manner. You can implement each enhancement package in a modular fashion; there's no need to run a major upgrade project. Moreover, you keep your core software stable while you activate only the new features and technical improvements you want – on your own timetable – to meet your business needs.

### License Implications

This document is designed to provide transparency on the potential license implications when you implement an SAP enhancement package for SAP ERP. Each SAP enhancement package contains business functions that you can activate separately and, in many cases, independently from each other. The licensing requirements are outlined in the table below. The standard licensing model for SAP also applies to business functions shipped as part of SAP enhancement packages. Please consult the licensing model document prior to choosing a functionality you want to learn about potential licensing implications for each business function. In case of doubt, please contact your SAP

account executive to provide you with detailed information about the required licenses.

Most of the business functions in SAP enhancement packages for SAP ERP are covered by the Enterprise Foundation Starter license (ERP_PACKAGE). However, the activation of some specific business functions might require additional licenses, which need to be in place prior to activating or using the business function. The list below indicates for Enhancement Packages 2 to 8 for SAP ERP which pricing item is required per business function in addition to the Enterprise Foundation Starter license. If more than one pricing item is mentioned for a specific business function, you may choose the most appropriate item or refer to the pricing comment field for more information. This document is subject to change to incorporate new business functions.

We recommend to regularly check SAP Note 1524246 – Relationships of licenses and business functions for the most up-to-date version of this document. You can contact your SAP account executive if you have questions regarding document updates, if you require additional information on how to buy and license

SAP software or if you want to understand which packages have already been licensed.

### License Measurement

To find out which business functions you have activated in your ERP system, check out the License Administration Workbench (LAW) on the SAP Support Portal.

### Easy Discovery of Relevant Functionality of SAP ERP

You can find detailed functional information on SAP ERP on SAP's corporate website at https://www.sap.com/products/enterprise-management-erp.html.

## How to Read This Document

The document contains three tables: Table 1 (starting on page 4) includes all enterprise extensions.

Table 2 covers the business functions for the core solution areas. This table is sorted by "Solution Area" in SAP ERP and contains the following items:

- Cross Business Suite
- Cross SAP ERP
- Enterprise Asset Management
- Financials
- Human Capital Management
- Operations: Cross Functions
- Operations: Manufacturing
- Operations: Sales and Customer Service
- Procurement
- Product Development and Collaboration

In addition, the table is sorted by "Key Functional Area". Here you will find all the respective key functional areas of the core solution areas mentioned above.

Table 3 includes all business functions for industries. In this table, the "Solution Area" is always "Industries". For this reason, this column is not shown. The column "Key Functional Area" contains the following industries:

- SAP for Aerospace & Defense
- SAP for Automotive
- SAP for Banking
- SAP for Consumer Products
- SAP for Defense & Security
- SAP for Engineering, Construction & Operations
- SAP for Healthcare
- SP for High Tech
- SAP for Higher Education & Research
- SAP for Insurance
- SAP for Media
- SAP for Mill Products
- SAP for Mining
- SAP for Oil & Gas
- SAP for Postal Services
- SAP for Professional Services
- SAP for Public Sector
- SAP for Railways Industry
- SAP for Retail
- SAP for Telecommunications
- SAP for Transportation & Logistics
- SAP for Travel & Logistics Services
- SAP for Utilities
- SAP for Waste & Recycling
- SAP for Wholesale Distribution

Business functions can belong to more than one area. However, in this document every business function is listed only once along with its primary area. If you don't find a specific business function, use the search functionality as described below.

Moreover, tables 2 and 3 are sorted by "Technical Name" of the business function. Business functions that begin with an "/" are listed at the very beginning.

If you are looking for a specific business function and don't know which area it belongs to, please use the search function in this document by pressing <Control> and "F" at the same time. When the search pop-up appears, enter the technical name of the business function that you are looking for (or any other search criteria).

Column "BF: Price List Item" indicates in which licenses a business function is included. If there are several licenses, it is sufficient to have one of the licenses mentioned (if not stated differently).

**Disclaimer**

| Feature: Key Functional Area | BF: Technical Name | BF: Name | EhP | Pricing Comment | BF: Price List Item |
|---|---|---|---|---|---|
| SAP for Automotive | AUTO_CI_1 | Automotive innovations | 2 | The usage of the JIT/JIS (Just-In-Time/Just-In-Sequence) functions requires the license package "SAP Just-in-time Inbound Process for Auto". The usage of Vehicle Management functionalities requires the licensing of "SAP Vehicle Management for Auto". In case of the "Dealer Portal" no dedicated license is needed, but the used processes (e.g. SAP Vehicle Management for Automotive) and the required users have to be licensed by the customer. | SAP Just-in-time Inbound Process for Auto (7017523); SAP Vehicle Management for Auto (7017522) |
| | AUTO_DP_1 | Dealer portal, vehicle manage- ment system, spare parts, and enterprise service | 4 | SAP Vehicle Management for Automotive (Not required for pure spare parts processes functionality support based in the SAP ERP application.) | SAP Vehicle Management for Auto (7017522) |
| | AUTO_GEN_CI_1 | Generic automotive innovations | 2 | The usage of Vehicle Management functionalities requires the licensing of the "SAP Vehicle Management for Automotive" package. | SAP Vehicle Management for Auto (7017522) |
| | AUTO_DP_2 | Dealer Portal, WebClient UI Framew., Variant Config.Integr. | 5 | The usage of the portal needs the corresponding user license (e.g. "limited professional" user). If dedicated "Automotive-specific" processes are used, the corresponding industry package has to be licensed. | |
| | WTY_DP_1 | Logistics and warranty claim processing for dealer portal | 4 | The usage of the portal needs the corresponding user license (e.g. "limited professional" user). If dedicated "Automotive-specific" processes are used, the corresponding industry package has to be licensed. | |
| | WTY_DP_2 | Warranty for Dealer Portal, WebClnt UI Framew., Innovations | 5 | The usage of the portal needs the corresponding user license (e.g. "limited professional" user). If dedicated "Automotive-specific" processes are used, the corresponding industry package has to be licensed. | |
| | AUTO_LOC_IN_1 | IS-Automotive Inbound Delivery - Localization for India | 5 | Enhancement of country version. | |
| | AUTO_LOC_JP_1 | IS-Auto for Japan | 6 | Enhancement of country version. | |
| SAP for Banking | /IBS/EAFS_RBD_BUSOPR | Business operations in the SAP Reserve for Bad Debts application | 4 | The customer needs to license based on usage one of the following price list item: SAP RBD. SAP RBD is the solution for risk provisioning, value adjustment, impairment on ERP base | SAP Reserve for Bad Debts for Banking, first 100 units (7018729a); SAP Reserve for Bad Debts for Banking, above 100 units (7018729b) |
| | /IBS/EAFS_RBD_BUSOPR5 | SAP RBD: Business Operations in Reserve for Bad Debts 5 | 5 | The customer needs to license based on usage one of the following price list item: SAP RBD. SAP RBD is the solution for risk provisioning, value adjustment, impairment on ERP base | SAP Reserve for Bad Debts for Banking, first 100 units (7018729a); SAP Reserve for Bad Debts for Banking, above 100 units (7018729b) |
| | /IBS/EAFS_RBD_INT_ECF | SAP RBD: ECF-Verfahren | 7 | The customer needs to license based on usage one of the following price list item: SAP RBD. SAP RBD is the solution for risk provisioning, value adjustment, impairment on ERP base | SAP Reserve for Bad Debts for Banking, first 100 units (7018729a); SAP Reserve for Bad Debts for Banking, above 100 units (7018729b) |
